

# Diana Huang

Senior Gameplay Engineer @ Rec Room

San Antonio, TX 78212

T: (510) 378 - 9223 E: dianaquang@gmail.com

## Experience

### Senior Gameplay Engineer @ Rec Room

2021 - Present

- ❑ Led development of the contextual ping system, prototyped with designers to answer design ambiguity & find the fun, wrote technical design and schedule, implemented the full feature including new touch controls, networking, & object pooling. Shipped on schedule, earning positive player feedback and increased time spent by 0.6% and 7 day retention by 0.19%.
- ❑ Improved load times through perf investigations, implementing scene preloading, parallelizing various async operations, and optimizing asset bundle downloads.
- ❑ Led development of the inventory tagging system, defined scope, wrote client & server technical design, partnered with other internal teams to deliver on time.
- ❑ Iterated with designers to build features for platform agnostic crossplay. Developed on a host of platforms ranging between consoles, screens, VR, & mobile as well as inputs types such as gamepad, KBM, touch.
- ❑ Implemented various features such as rebindable hotbar, worldspace canvas interactions, new UI, progression system, localization, bug reporting.
- ❑ Built tool that enabled the art team to upload avatar items and consumables from the Unity editor to the test server.
- ❑ Unity / C# / Addressables / Photon / Git / Statsig / Amplitude
- ❑ Developed for Steam / Standalone / VR / iOS / Android / PS4 / PS5 / Xbox

### Associate Software Engineer @ Blizzard Entertainment, Inc.

2020 - 2021

- ❑ Worked with QA to develop Echo, a player feedback processing tool for Diablo Immortal. Built upon user interface, implemented server APIs, prototyped time slicing technique to process at scale, wrote SQL queries against large datasets.
- ❑ Implemented a bootstrapper to automate Echo updates and runs through Jenkins.
- ❑ Responded to and resolved several emergent issues in a live service QA tool.
- ❑ C# /.Net Tech Stack / Git / SQL / Jenkins / Octopus Deploy / RESTful

services

### Software Engineering Intern @ Blizzard Entertainment, Inc.

2019

- ❑ Architected and implemented a tool to report link integrity within the Blizzard company network.
- ❑ Built upon a live service testing API that bundled several proprietary services.
- ❑ Teaching assistant in the Girls Who Code program for the Intro to C# course.
- ❑ C# / .Net Tech Stack / Git / Jenkins / Octopus Deploy / RESTful services

### Software Engineer @ MechMania 24 & 25

2018 - 2019

- ❑ Led a team of three developers to develop the visualizer which consumed serialized game data from competitors and visualized the game in Unity.
- ❑ Implemented a map generation tool to streamline game design workflow.
- ❑ MechMania is a 24-hour AI hack-a-thon at the annually hosted Reflections Projections technology conference at UIUC.
- ❑ Unity / C#

### Teaching Assistant @ University of Illinois at Urbana-Champaign

2017 - 2018

- ❑ Intro to Unity course. Supervised student Unity projects and assisted their development by answering technical questions and hosting office hours.

## Education

### University of Illinois at Urbana-Champaign, Class of Winter 2019

- ❑ B.S. in Computer Science & Linguistics. Dean's List
